

COMPANY DOSIER

PROFESSIONAL

The Company

MN STEKLO is a Slovenian company dedicated to design and manufacture glazing systems founded in the year 2015, result of more than 25 years of accumulated experience of its professional team.

A global company

We export to more than 40 countries and work in eight different languages. We count with a multicultural sales department able to face the needs that market demands.

Continuous innovation

Both in the product and the business's strategy. Our systems and configurations are protected by patents.

Consolidate brand

Flexibility

Our products are 100% customizable.

Corporate mission

Our purpose is clear: improve our clients quality of life, both in their homes and their business.

**Manufacture simple. Install simple.
Maintenance free.**

Anodized
certified suppliers

Our strenghts

MN STEKLO Principles

Commitment to excellence
Highest quality of the raw materials and perfect finishings

Maximum simplicity
Always looking for the less components possible and the simplest design

Development and continuous innovation
All our products are protected by patents and utility models

European Hi-Tech
Our products fulfill the most demanding quality standards

Warranty
All products have 5 year warranty

Perfect for light structures
Our systems are bottom weighted

Increase the net usable area
You can add more net usable area without increasing the built area

Maximum comfort
Transform your outside spaces into inside ones, just by reducing noise and thermal fluctuations

Minimal maintenance
No need for costly annual inspections

Protection against rain and wind
Our systems also avoid dust getting into the covered space

Choose your desired glazing
The systems allow three widths of tempered, laminated, solar control or low-e glass: 8, 10 and 12 mm

System around the world

System have presence in
more than 40 countries
across the five continents.

solutions are
adapted to the most demanding
weather conditions,
so our market is global.

Our solutions for every need

We are committed to the search of architectural solutions to create new spaces in houses and locals, preserving their outside function.

Our systems add net usable area without increasing built area. No visual impact on the façade

MN STEKLO PIVOT

The sliding retractable MNSTEKLO Pivot System is the best alternative amongst balcony enclosures. **It's a bottom weight system. No wheels or bearings are needed.**

Maintenance is minimal due to the system features and the high quality materials. This provides a better reliability and increased security.

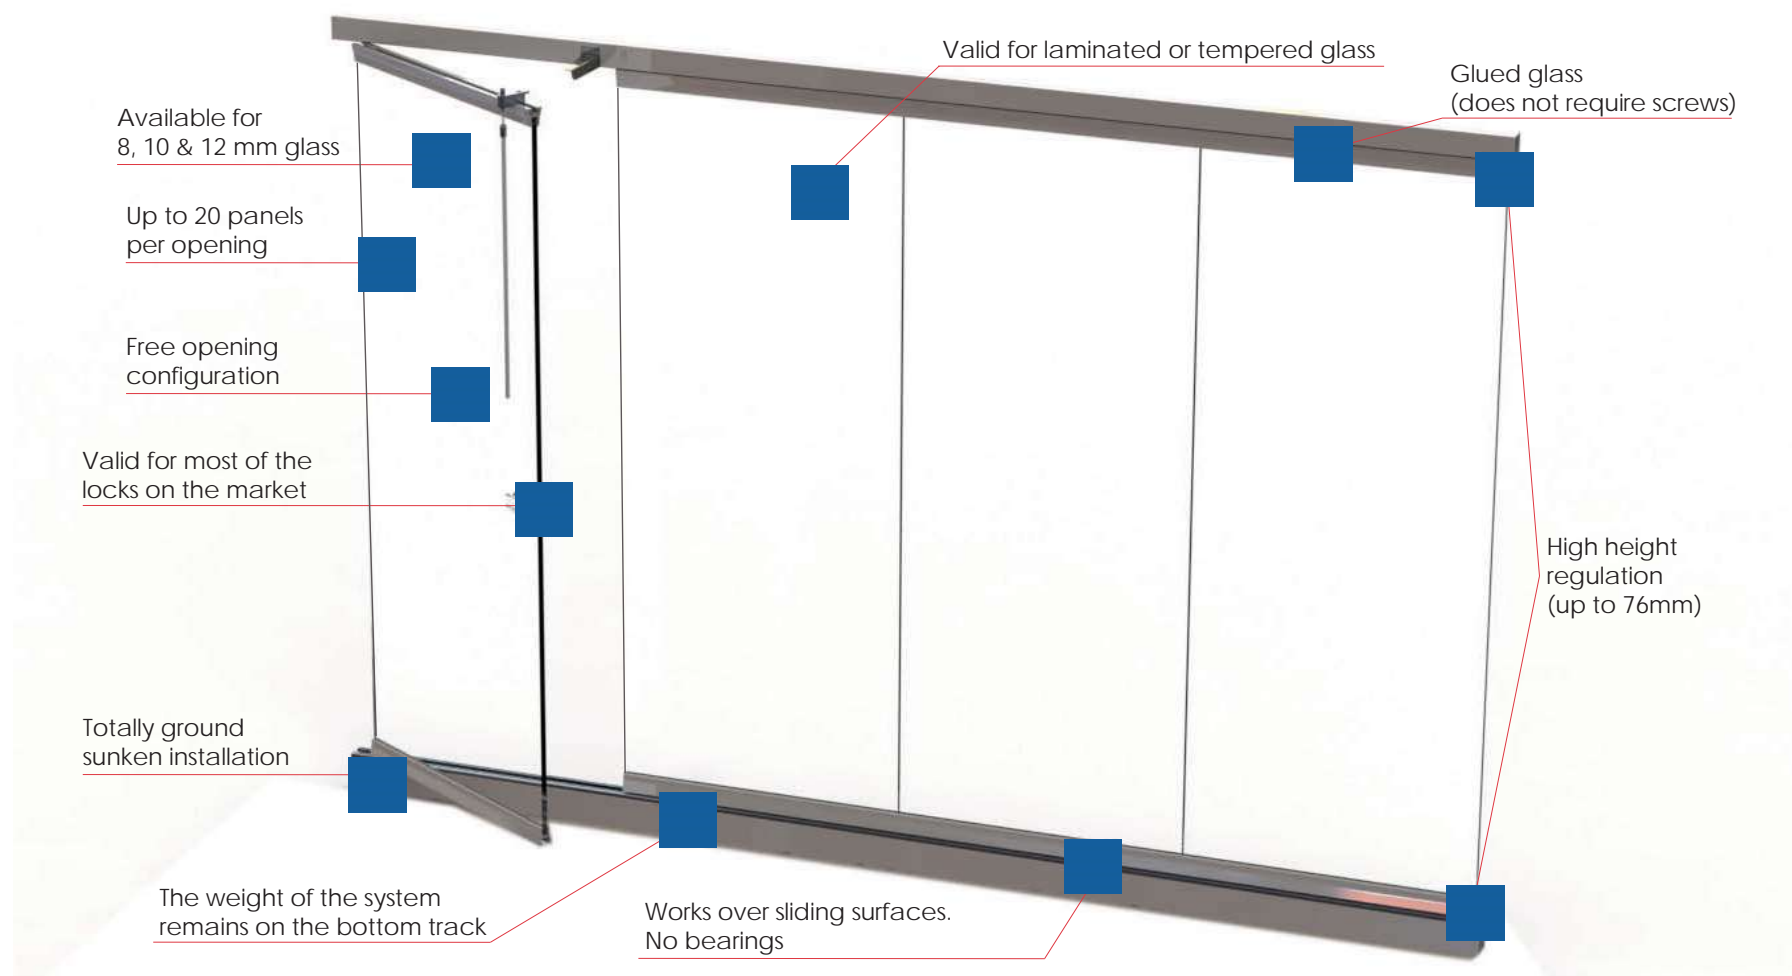

MN STEKLO SLIDE

MNSTEKLO SLIDE is the new multitrack frameless system, with the least amount of components in the market, all of them of the highest quality. **It's a bottom weight system.**

Our system is the most profitable one on the market for both the manufacturer and the installer because **manufacturing and installation can be accomplished in just one day.**

PIVOT

Frameless System A world of possibilities

MN STEKLO PIVOT

MN STEKLO™

Bringing life to outside spaces

Pivot is a retractable system that
increases the livability of a building.

As it is a **100% customizable product**,
the **possibilities are virtually unlimited**:
sections with corners, curved balconies,
sunken installations, multiple finishings, etc.

**The special configurations available
make it the most complete system
on the market:** intermediate sliding door,
armless configuration, side lock
and kit for flexing roofs.

Features

Bottom weight system. No wheels or bearings are needed.

Glass thickness. 8, 10 or 12 mm

Cornering turn. Between 90° and 270°

Air circulation possition.

Mosquito net available

Components. Protected and covered by a thin Zinc and Aluminium layer. Good resistance to corrosion, modifying the friction factor without alter the hydrogenation.

High resisting components. As per the saline mist tests ISO 9227, ASTM B117, DIN 50021. More than 750 hours in the test chambers.

Finishing. All options available from anodized, lacquered (RAL chart) and wood-like

Technical features

Wind resistance: Type 6

Acoustic allowance: 34 dB

Thermal insulation: 5,6 W/m²K

Permeability to air: Type 2

Maximum

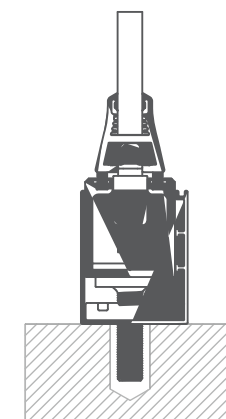

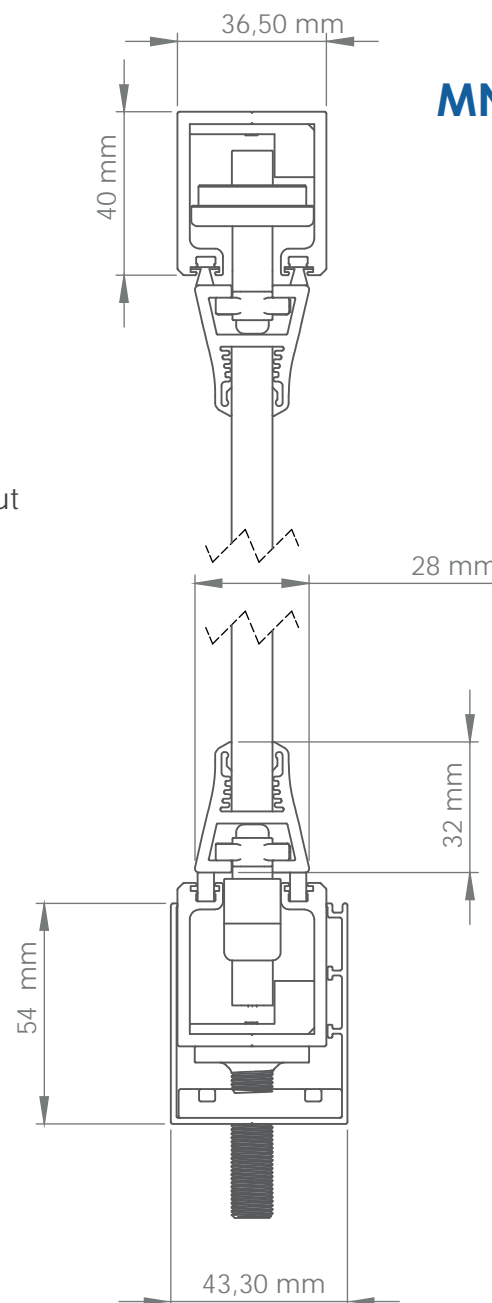

Panel width: 800 mm

Door width: 1000 mm

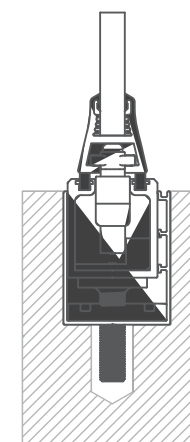

Maximum height: 3000 mm

Maximum panels per opening: 20

MN STEKLO PIVOT

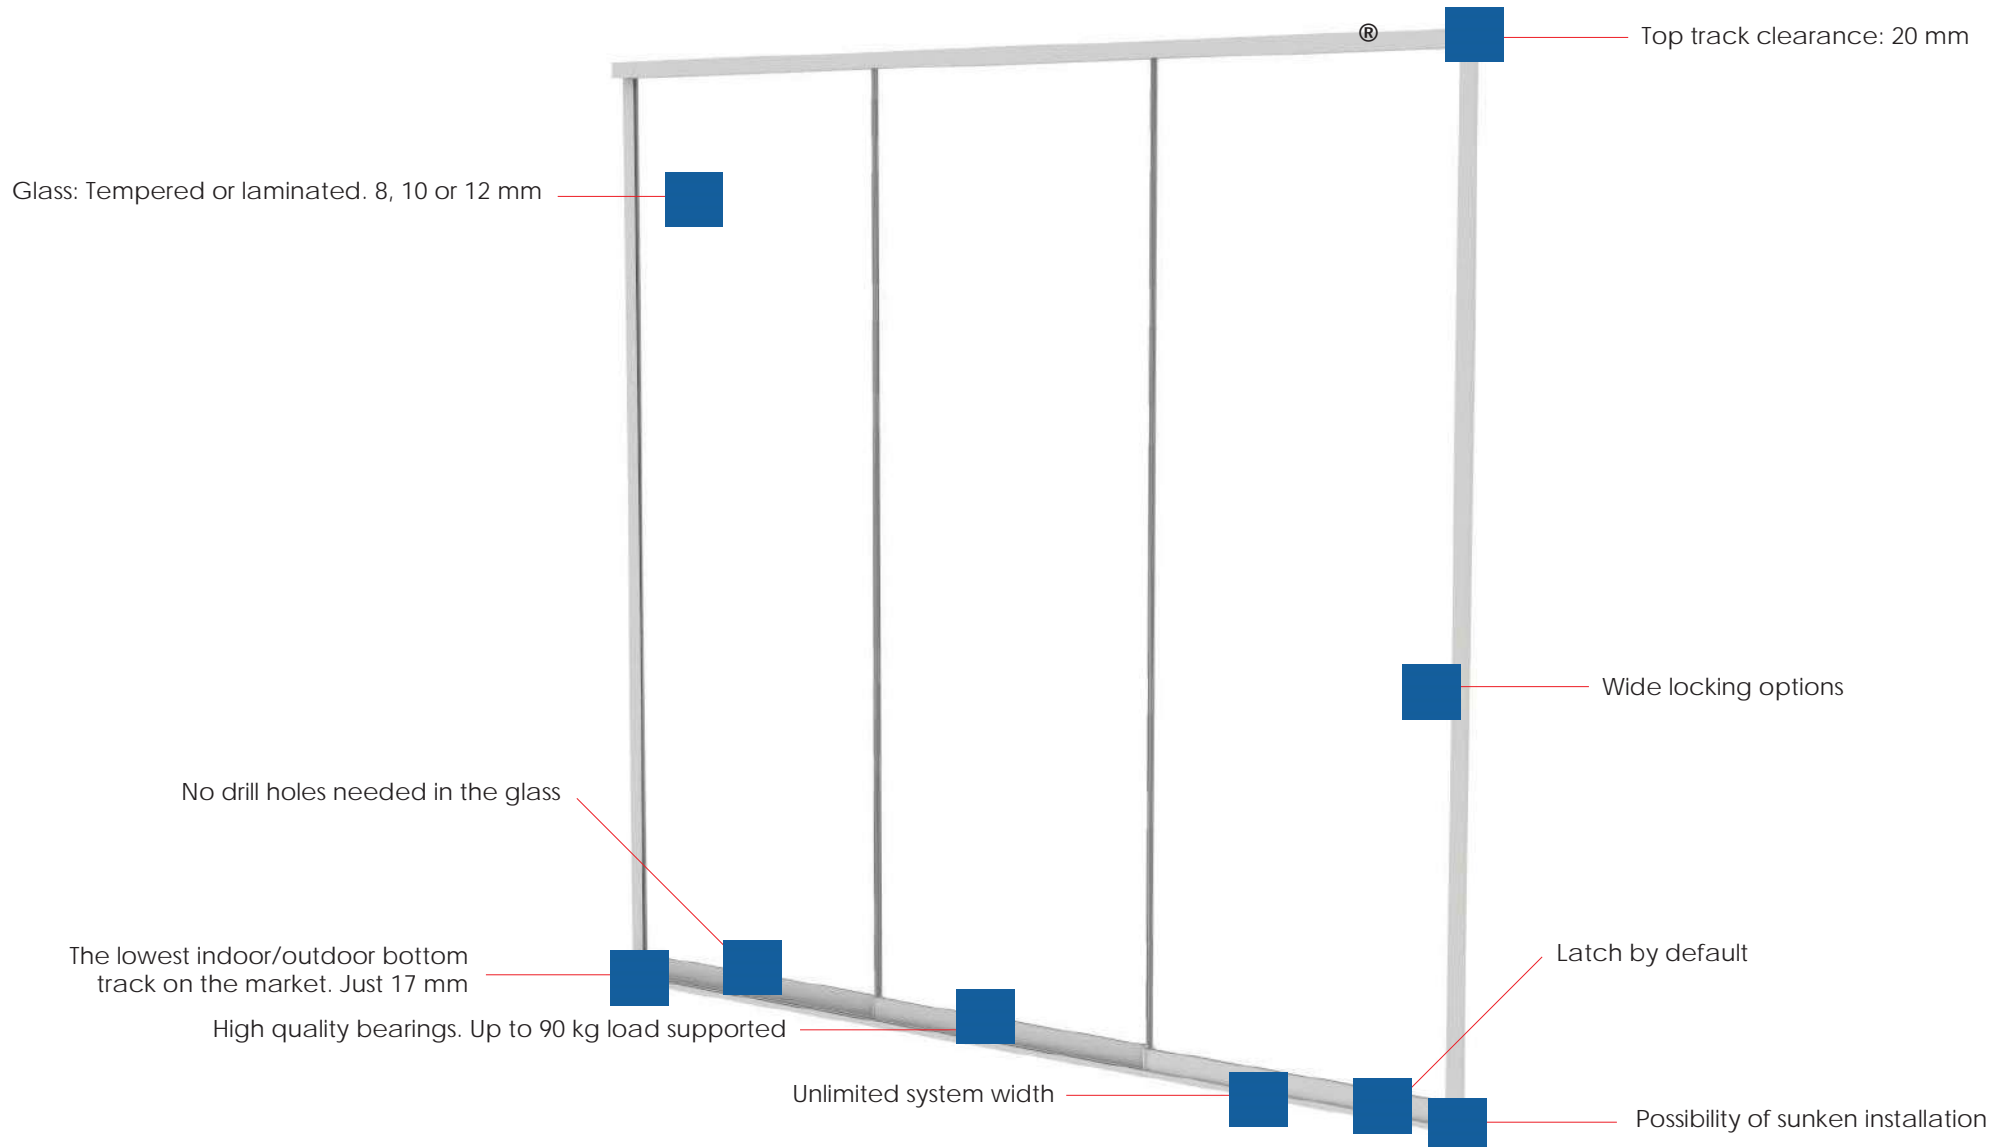

Mounted System

Sunken System

Multitrack Frameless System

Top performance. Top simplicity.

Unlimited options. Top performance.

Slide is an unlimited width system.

It is easily expandable by single track extensions from the basic three tracks guide. Also, it has the widest variety of locks on the market.

Central and side opening are available, and sunken installation is possible.

This is a very simple and tough system, recommended for restaurants, space dividers, porches and other sites where tolerance to high frequent use is a must.

SLIDE3

Features

Bottom weight system.

Glass thickness. 8, 10 or 12 mm.

Minimum track number: 3

The lowest indoor/outdoor bottom track on the market: Just 17 mm

Central and side opening

Possibility of sunken installation

No drill holes needed in the glass

Installation without gluing (8-10 mm). Just one day for 8 and 10 mm glass systems.

High-performing drainage for water and dirt

Finishing. All options available from anodized, lacquered (RAL chart) and wood-like.

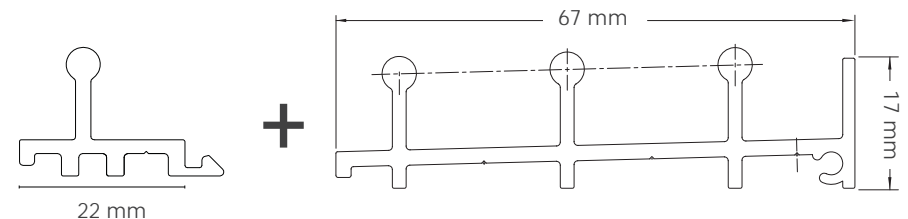

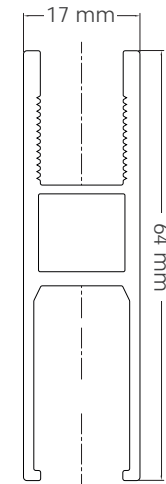

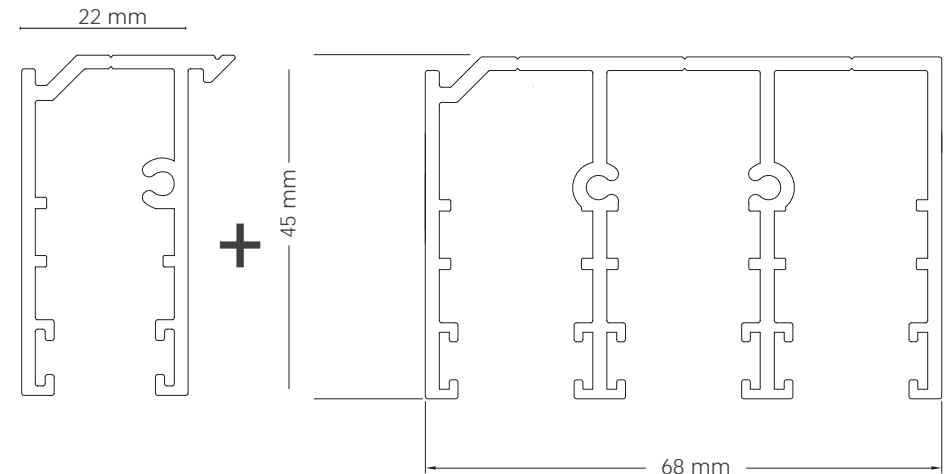

Maximum

Maximum panel height: 3100 mm

Maximum panel width: 1800 mm

Maximum panel weight: 90 kg

Top track extension

Bottom track extension

The best ERP on the market

100% intuitive and easy to use is suitable for all clients and allows to manage all the processes in a single software: Production products.

Also, technical data for each project can be easily generate by this software.
